## Hotfixes

### Installed

#### **31-03-2023 Security Intelligence Update for Microsoft Defender Antivirus - KB2267602 (Version 1.385.1648.0)**

Install this update to revise the files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

#### **30-03-2023 2023-03 Cumulative Update Preview for Windows 10 Version 22H2 for x64-based Systems (KB5023773)**

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

#### **30-03-2023 Windows Malicious Software Removal Tool x64 - v5.111 (KB890830)**

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.
